Office Action Summary	Application No. 10/631,907	Applicant(s) LITWINSKI ET AL.	
	Examiner Flemming Saether	Art Unit 3677	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Double Patenting

The following double patenting rejection is based on the assumption is that the instant application is assigned to The Boeing Co. In that regard, the applicant is requested under rule 105 (37 C.F.R. § 1.105) to provide the assignee of the current application.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 19-21 and 30-34 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 7 of U.S. Patent No. 6,638,381. Although the conflicting claims are not identical, they are not patentably distinct from each other because the article resulting from the method of the 6,638,381 includes claimed structure that is the same as that in the instant application.

Claim Rejections - 35 USC § 102

Art Unit: 3677

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 19, 20, 30 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by the Japan reference JP 10195567A (Japan '567). In the translated abstract and use of the Japan '567 reference is disclosed an a rivet manufactured to include a matrix having a grain size of 5 micrometers or less which is within the claimed range. Japan further discloses the material to include aluminum. The stir welding is a product-by-process limitation wherein it is only the final product considered for patentability.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 21 and 32-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japan '567 as applied to claim 19 above, and further in view of Briles (US 4,159,666). The translation of Japan '567 does not disclose the specific configuration of the rivet nor the rivet including titanium. Briles discloses a rivet having a head as well as the equivalence of aluminum and titanium in rivets (column 3, lines 51-56). At the

Art Unit: 3677

time the invention was made, it would have been obvious for one of ordinary skill in the art to form the rivet of Japan '567 as having a head and of titanium as disclosed in Briles such that the rivet would conform with the substrates to prevent the formation of gaps at the head, as discussed in Briles. The particular aluminum alloy is known and would have been recognized to use depending upon the particular application.

Response to Remarks

Applicant's sole argument is the swearing behind of the Keener patent. In response, since it was discovered that the Keener patent appears to be assigned to the same assignee as the instant application, a double patenting has been applied.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
